

## Exam Score Distribution (out of 100 points)

Minimum: 15

Maximum: 85

Mean: 41.36

Median: 38

Standard Deviation: 18.35

### Notes:

- This was a hard test! While I meant it to be at the "hard regionals" level, it was probably more towards the states level. People generally did the best on the fill-in-the-blank portion, followed by the multiple choice section, followed by the FRQ section.
- Only one team got the challenge question completely correct, although a few teams made solid attempts and I gave a few points of partial credit depending on how far you got. See the answer key for how to go about solving it (although there are actually many ways).
- I was happy with the spread of scores. In particular, the top several teams were all separated by a fairly significant amount.
- I did make one mistake with the key as noted. I sincerely apologize for the mistake, but please know that it did not end up impacting anyone's final placing.
