

Compute This! 2006 #1

Problem:

Create a line graph showing the average annual temperature of Colorado Springs, CO from 1950 to 2000.

Short Answer:

1. What is the lowest annual average temperature for Colorado Springs between 1950 and 2000? In what year did this average temperature occur?
2. Would you expect the average temperature for the month of April to be above or below the average annual temperature for a given year? Why?
3. What different weather factors can help to explain the average annual temperature?
4. What are some of the potential effects of changes in the average annual temperature?
